

CAM+ • CONNECTED AUTOMATED MONITORING FOR HEALTHCARE

Certainty for every sample, every dose, every site.

Continuous, audit-ready monitoring of every fridge, freezer, LN₂ store and incubator across hospital labs, blood banks and pharmacies — with alarms that reach a person, not just a screen.

PROUD SPONSOR

MSC 2026 Laboratory Cup

Supporting Ireland's laboratory community. Come and find us on the day.

24/7

Monitoring, alarms and response — staffed or not

±0.3°C

Full-range accuracy; traceable, serialised probes

−200 to +200°C

LN₂ cryogenic through ULT, fridges and incubators

5yr

Sensor battery life, with local buffering — zero data loss

HOW CAM+ WORKS

Wireless sensors

Transmitter outside the unit, calibrated probe inside. Fitted in minutes.

WARP on site

Stores data locally, sounds an audible alarm and forwards to the cloud.

CAM+ cloud portal

Every site in one live view: tamper-proof records, reports, certificates.

Alarm → audit

Call, SMS and email escalate until accepted; each alarm closes with a signed audit.

WHAT YOU CAN MONITOR

Fridges & freezers

PT1000 probes, −100 to +200°C; long-cable option for cold rooms

Incubators

Combined temperature and humidity on a single umbilical probe

Doors

Temperature plus door-contact on one sensor — catch the door left ajar

Power & equipment faults

Mains failure, compressor trip, fridge and incubator alarm contacts

LN₂ & cryogenic

Tank and flask probes down to −200°C for cell and tissue banking

Rooms & stores

Ambient temperature and 0–100% RH for labs and drug stores

O₂, CO₂ & pressure

Differential pressure and gas levels via 4–20 mA transducer inputs

Mapping & validation

Mapping sensors for fridge, freezer and warehouse qualification

BUILT FOR REGULATED LABS

- ✓ **Tamper-proof records** — every reading timestamped and immutable; no transcription or backfilling
- ✓ **21 CFR Part 11** ready, with optional eSignature on incident audits and reports
- ✓ **Supports GMP, MHRA & CQC** requirements; records that stand up in ISO 15189 and quality audits
- ✓ **ISO 17025 traceable calibration** — annual recalibration, certificates uploaded to your portal
- ✓ **ISO 27001** certified cloud platform; optional VPN link to your network
- ✓ **One-click reports** — tabular, graphical, MKT and summary; export to PDF or Excel

PROVEN AT SCALE

60+

NHS trusts, incl. NHS Blood & Transplant

10,000+

samples a day protected at one blood sciences lab

300+

NHS sites live, single sites to networks

7 days

to fully monitor NHS Nightingale, calibrated

NHS customer base: £3.7m staff time repurposed, £2.6m less stock loss, £840k audit time saved — per year.

“Checkit replaced a very painful and highly inefficient process and helped bring us into the digital era. They’ve saved us countless hours, and it’s far more accurate.”

Joseph Ranne, Project Manager — Octapharma

See CAM+ live at MSC Expo 2026

Bring a fridge count or a floor plan. In 15 minutes we’ll show you what a monitored estate looks like, what it costs and how quickly it goes in.
